TITLE: MAGNESIUM DICHLORIDE-ALCOHOL ADDUCTS AND CATALYST  
COMPONENTS OBTAINED THEREFROM

INFORMATION DISCLOSURE STATEMENT

It is respectfully requested that the documents listed on the accompanying Form PTO/SB/08a be made of record and considered with respect to the above-referenced U.S. patent application.

Further to the Information Disclosure Statement submitted February 3, 2006, Applicants hereby provide the following and included supplementation.

The documents cited in said earlier Information Disclosure Statement were referenced in an International Search Report regarding a European counterpart to the present application; namely, European Application No. 04 709 240.8-2109. More recently, an examination report has issued in that European counterpart application addressing these previously disclosed references, including a Written Opinion wherein claim 1 is rejected. Responsive to that Written Opinion, Applicants amended the claims and provided rebuttal argumentation. It is the purpose of the present Information Disclosure Statement to inform the Office about the examination report and Applicants' response thereto, the substance of the report and the response, and as well, the positions regarding patentability taken therein by Applicants.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

The filing of this information disclosure statement shall not be construed as a representation that a search has been made, or an admission that the information cited is, or is considered to be, material to patentability, or that the information is analogous to the subject matter of the present invention. Further, the filing of this information disclosure statement shall not be construed as an admission against interest in any manner.
